

# SOFTSEAL®-STFR

## NON-INVASIVE HEMOSTASIS FOR RADIAL CLOSURE

Whether diagnostic or interventional, have confidence at the end of your procedures.

SoftSeal®-STFR is a proprietary high molecular weight non-woven fiber designed to be soft and flexible. The patented surface treatment process creates a pH controlled pad that adheres to bleeding tissue through a strong ionic bond.

## Clinical Benefits

### Rapid Hemostasis

- Workload reduction
- Faster time to Hemostasis
- Increased workflow efficiency
- Decreased patient length of stay

Advanced technology in a unique and proprietary fiber structure that promotes:

- Reduced compression time and accelerated hemostasis
- Greater patient comfort
- Increased workflow efficiency

## Comparison of Outcomes

Jane Meitler, MSN, RN, ACNS-BC, CV-BC; Theresa Briggs, MSN, RN, RCIS; Amanda Sedacki MSN, RN, CV-BC; Jeanne Hlebichuk PhD, RN, NE-BC. "Comparison of Two Methods for Transradial Hemostasis After Cardiac Catheterization and Impact on PostProcedure Efficiency." Cath Lab Digest, January 2024.

## Value To Procedure

- Accelerated hemostasis
- Soft, pliable and easy to use
- Stays in place for 24 hours
- Easily removed with irrigation
- Effective with patients on anticoagulation
- Promotes early ambulation
- Biodegradable and biocompatible
- Purified and sterile for use with all patients.
